

AI-Powered Test Case Generation

---

Test Smarter and Go To  
Market Faster with  
**AI-Powered Test Case  
Generation**

# Overview

---

Manual test case generation is time-consuming and inefficient, slowing down project timelines. Businesses need a faster, more reliable way to create and execute test cases. It leverages AI to automate test cases and generate scripts, drastically reducing manual effort and enhancing testing efficiency. This ensures timely project delivery and improved software quality.

## Key Features

---

Integration with project management tools

Automated test case generation

Automated script generation

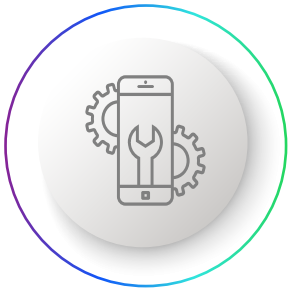

Customizable test cases

Design rigorous and exhaustive test cases for complex systems automatically with an easy-to-use, **AI-driven test case generator.**

# Deliver High-Quality Products Faster with AI

---

## Data Integration:

Connection to project management tools like JIRA and Azure, DevOps for fetching user stories and project data.

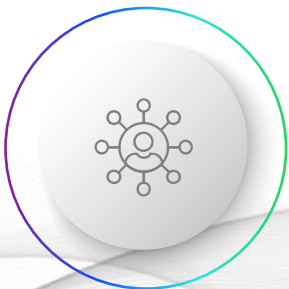

## Test Case Generation:

Automated creation of test cases based on user stories and additional documentation.

## Script Creation:

Conversion of test cases into executable scripts using predefined frameworks.

## Export Functionality:

Options for exporting test cases and scripts back to project management tools.

## Customization:

Manual adjustments for refining and perfecting generated test cases and scripts.

# The SLK Advantage

---

## Save Time

Generate test cases in minutes, enabling agile ways of working.

## Increase Efficiency

Automate repetitive tasks, freeing up resources for complex testing.

## Improve Accuracy

Ensure consistent, detailed test cases and scripts, minimizing human errors.

## Streamline Workflows

Integrate with existing project management tools for a smooth workflow.

## Key Benefits

---

**30%**

Additional sprint  
output

**7.7 days**

Sprint cycle optimized  
from 10 days
