SLK
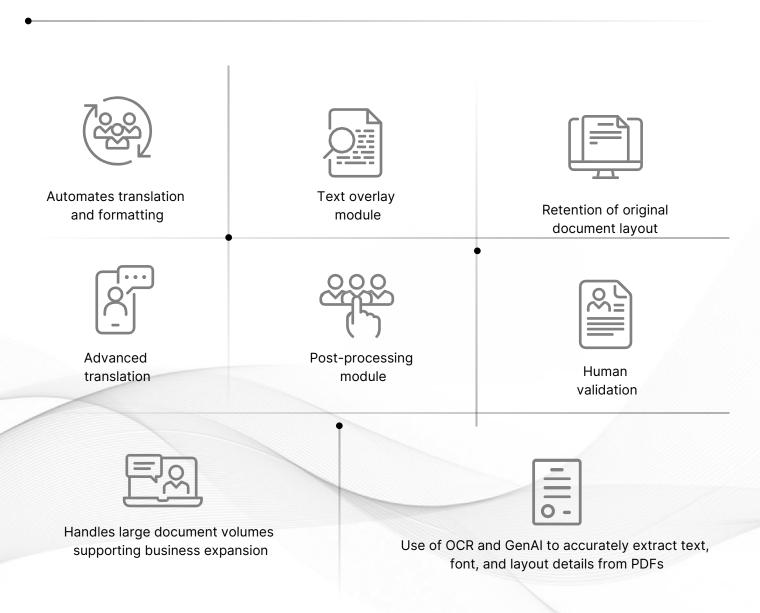

Document Language Translation

Accelerate Product Manual Translations with **Gen AI-Enabled Document Language Solutions**

Overview

Managing product manuals in multiple languages is often challenging due to hidden text, format inconsistencies, and complex language scripts, leading to delays and errors.
SLK's Document Language Translation solution leverages advanced Gen AI to streamline the translation process, ensuring accuracy, format preservation, and efficiency.
Our Gen AI-enabled solution automates the extraction, translation, and formatting of product manuals, enabling seamless multilingual support for your global customer base.

Key Features

Automates translation and formatting

Text overlay module

Retention of original document layout

Advanced translation

Post-processing module

Human validation

Handles large document volumes supporting business expansion

Use of OCR and GenAI to accurately extract text, font, and layout details from PDFs

Enhance multilingual support with **Gen AI-driven document translation.** Achieve efficiency, accuracy, and customer satisfaction with our advanced solution.

AI-Driven Solutions for Accurate, Fast, Multilingual Product Manual Translations

Input	PDF Extractor Module	Text Overlay Module	Output
• PDF in English • Product Manuals • Handbooks	• PDF data extractor & layout module • OCR • Text extraction • Meta data	• Blank pdf creator • Layout preserver • Overlay text • GPT 3.5	PDF file in 9-10 languages

The SLK Advantage

Automation & Efficiency

Eliminate the need for manual extraction and translation, significantly reduce processing time.

Accuracy & Reduced Errors

Gen AI-powered extraction and translation ensure high accuracy and minimal errors.

Scalability & Cost-Effectiveness

Scale automatically to handle large volumes without additional infrastructure costs.

Integration Potential & Customizable Approach

Integrate smoothly with existing document management systems, minimizing workflow disruption. Tailored solutions to meet specific business needs and goals.
