

Fast API

Define, Develop and
Deploy APIs with
**Our Low-Code Cloud
Agnostic Platform**

Overview

Banks and other financial institutions using traditional APIs have failed to enable marketplace banking due to longer timelines, associated higher costs and risk on returns. This has prompted the need for low code API platforms with adaptation to industry standards that enable banks to create API economy at scale with the help of pluggable adapters and integrations.

Fast API from SLK is a low code cloud agnostic API platform for enterprises to define, develop and manage APIs with fastest GTM and achieve savings upto 70% of traditional API.

Key Features

Low code
API development

Intuitive CX with
WYSIWYG designer

Compliance with
industry standards

Built-in API observability
and monitoring

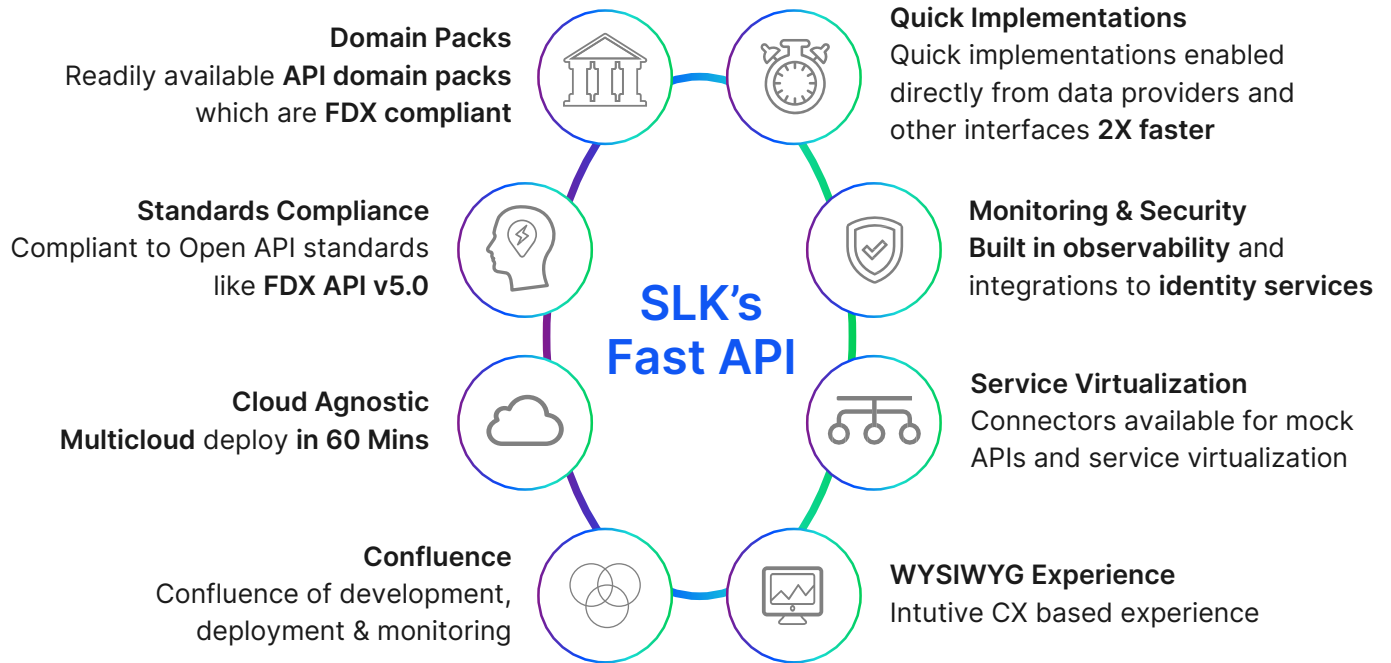

Multi-cloud
compliant

Readily available
domain packs

Redefine API development with our
**low-code, cloud-agnostic platform, enabling banks
to innovate faster and scale effortlessly.**

Transform API Development with Ease

The SLK Advantage

Convergence of Dev, Test and Monitor in a single platform

Intuitive, easy to use UI
