

Customer Onboarding

Streamline Your Onboarding Process and **Enable Faster Document Handling**

Overview

Banks must review numerous documents during customer onboarding due to regulatory and risk requirements. While some documents like tax-related ones are streamlined, others for Trusts, Estates, and Incorporations need state-specific legal reviews. Challenges include slow, manual handling, lack of scalability, compliance issues, and inconsistent data quality, leading to delayed onboarding, increased costs, and customer frustration.

Customer Onboarding solution uses advanced AI to streamline document management for account opening. Automating document identification, classification, data extraction, and processing reduces costs, improves accuracy and compliance, and accelerates due diligence, enhancing customer satisfaction and workflow efficiency.

Key Features

Automated document processing

Editable text and key data points

Machine learning accelerators

Cloud-based scalability

Built-in compliance checks

Data validation tools

Human in the loop

Automated audit trails

Automate document handling to reduce costs, improve accuracy, and ensure compliance, leading to **faster customer onboarding and higher satisfaction.**

Streamline Onboarding with AI-Driven Document Handling for Faster Customer Onboarding

The SLK Advantage

Leading the Way in AI-Powered Customer Onboarding

Proven AI Solutions

Our AI solutions have a track record of success in transforming several processes, including customer onboarding, and delivering tangible results.

Customizable Approach

We tailor our AI solutions to several LOB-specific needs, ensuring they align with your business objectives.

Seamless Integration

We ensure smooth integration of AI with your existing systems and infrastructure, minimizing disruption and maximizing efficiency.

Ongoing Support & Optimization

We provide continuous support and work with you to optimize your AI-powered customer onboarding operations, ensuring sustained success and growth.

Key Benefits

37%

Improved account
opening speed

27%

Reduction in CDD/KYC
efforts by elimination of duplication
