

Mithril

Converse with Your Documents with **GenAI-Powered Mithril**

Overview

Sifting through vast amounts of data across documents and diverse formats is cumbersome and time-consuming. Mithril, a GenAI-powered chatbot, is a gateway to effortless information retrieval from any document, no matter the volume, complexity, or source. It understands complex queries in natural language, swiftly fetches relevant information from text, diagrams, or tables, and provides traceability to show exactly where the information comes from, eliminating any hallucinations in data.

Key Features

Multi-modal, multi-lingual processing

Extensive document reach

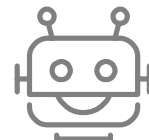

Intent understanding

Document hierarchy

Error handling & fallback mechanism

Intuitive chatbot interface

Advanced traceability

Advanced anti-hallucination technology

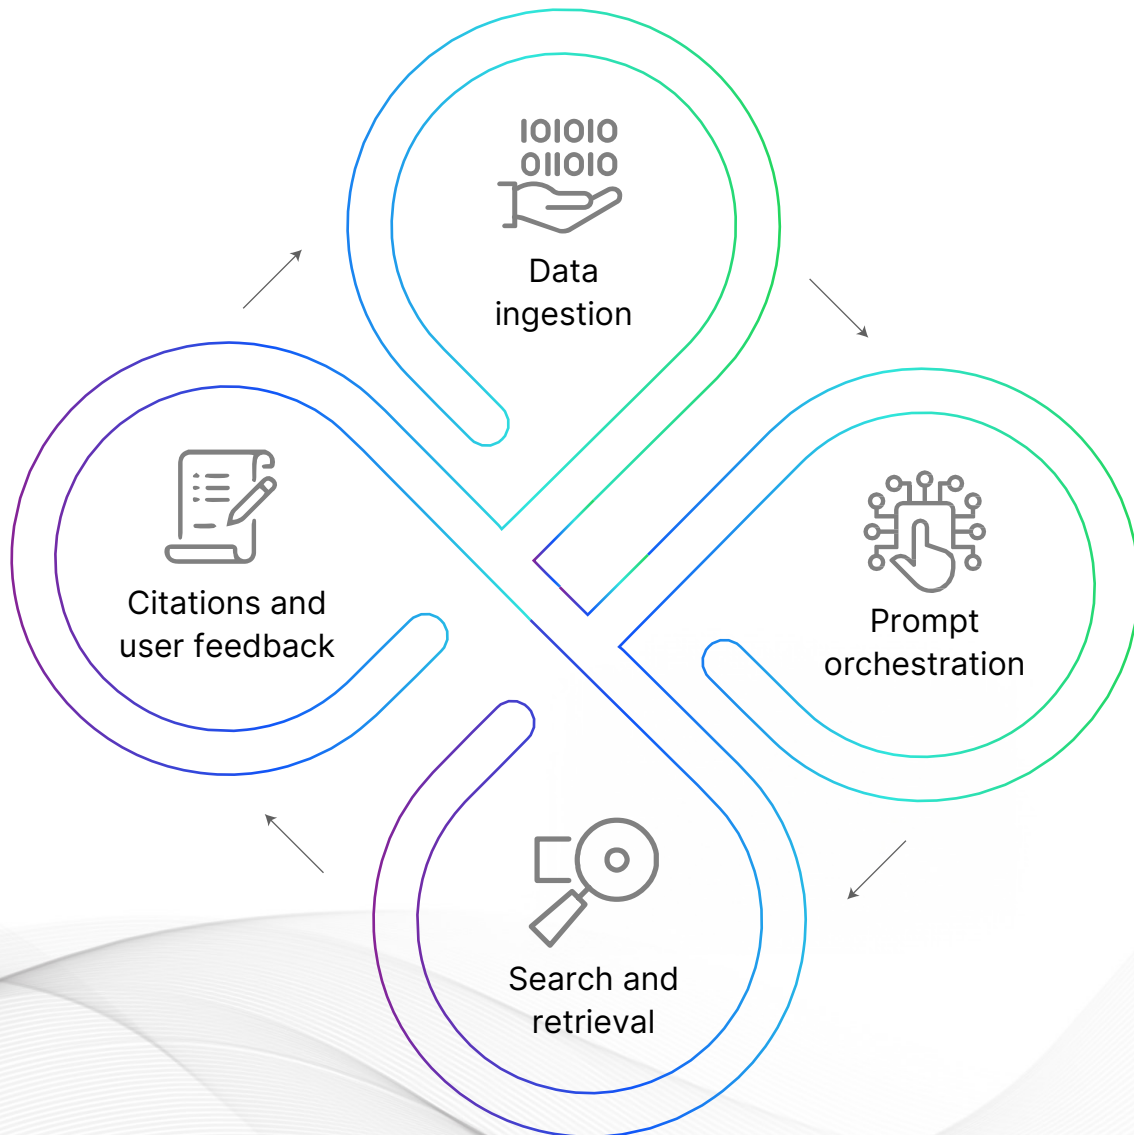

Conversational flow for context retention

Every document is just a conversation away with Mithril.
Transform how you access and interact with your documents - fast, accurate, and traceable insights at your fingertips like never before.

Experience Precision & Speed in Information Retrieval

- Rapid data ingestion from various sources.
- Prompt orchestration and interactive queries based on user needs.
- Search and retrieval of relevant data efficiently.
- Citation and feedback processing from user interactions.

The SLK Advantage

Instant, Reliable Data

Get immediate, verified answers with no delays.

Scalable, Rich Data Comprehension

Processes millions of documents and diverse formats effortlessly.

Accelerated Insights & Workflow Automation

Boost productivity by reducing retrieval time and automating complex processes.

Cloud & Web Integration

Seamlessly integrates with Teams and serves as dynamic website support.

Operational & Expert Assistance

Provides quick operational support and precise, on-demand expert advice.

Multi-Source Connectivity

Integrates with SharePoint, databases, OneDrive, and more for comprehensive data access.
